Geographical division of Iceland

In this booklet the regional division of Iceland used by the Statistics Iceland is followed. There are seven regions:

- The Capital region
- The Southwest
- The West
- The Westfjords
- The Northwest
- The Northeast
- The East
- The South

Feed and fodder 1970-2006

	1970	1980	1990	1995	2000	2005	2007
Grass pellets, tonnes	1,335	12,858	5,200	3,300	600		
Dry hay, 1000 m ³	2,060	3,704	2,515	1,263	433	206	144
Silage hay, 1000 m ³	141	174	744	1,207	1,958	1,762	1,849
Grain (barley), tons			885	485	4,337	9,773	11,246

The total size of cultivated grass fields is estimated 1,220 km² and other cultivated fields (vegetable and potato gardens, fodder and grain fields) 70 km² which totals 1,290 km². Arable land below 200 m above sea level is estimated 15,500 km² which means that 7.9% of arable land is used for grass cultivation and 0.5% for other crops which totals 8.4%.

Source: Farmers Association of Iceland, grass pellet producers, Agricultural Research Institute.

Grain cultivation 1991-2007

Year	Crop yield from trials, grain, tons/hectare	Grain fields as usage of seed, hectares	Total grain crop, tons, estimated
1991	3.5	200	525
1992	1.2	400	240
1993	2.2	400	440
1994	3.4	600	1,700
1995	2.4	500	960
1996	3.7	900	2,960
1997	3.8	1,500	4,560
1998	3.9	1,800	4,680
1999	3.3	1,800	4,620
2000	4.2	2,000	6,300
2001	4.5	2,100	7,650
2002	4.1	2,400	7,585
2003	5.5	2,600	11,000
2004	5.3	2,330	10,255
2005	3.6-6.2	3,636	9,773
2006	2.8-7.9	3,588	11,253
2007			11,246

Estimated total crops based on usage of seed in on one hand and, on the other, on crops from trials. The outcome is probably a little too high, but it shows that homegrown grain represents approximately 10-12% of the grain used as fodder in Iceland. 45% of the grain cultivation is in the southern part of Iceland, 35% in the north, 15% in the western part and 5% in the east of Iceland.

Artificial fertilizer (tons)

	1981	1986	1991	1996	2001	2003	2007
Nitrogen (N)	14,900	12,931	12,163	12,100	12,382	10,344	13,832
Phosphorus (P ₂ O ₅)	8,127	6,991	5,997	5,240	5,471	3,394	5,982
Potash (K ₂ O)	6,184	5,295	4,575	3,960	4,013	2,114	4,457
Total	29,211	25,217	22,735	21,300	21,866	15,852	24,271

The quantity is shown in terms of pure fertilizer substances.

Common usage of fertilizer for cultivated grassland is 100-140 kg/ha of Nitrogen (N), 15-30 kg/ha of Phosphorus (P₂O₅) and 40-60 kg/ha of Potassium (K₂O).

Agriculture production by branches 2006

1990 for comparison*

* The year 1990 was assessed on the basis of the valuation estimate of the Agricultural Production Council and the year 2006 was based on agricultural excise.

Total taxation base of agricultural excise in the year 2006: ISK **18,499,921,467**

Agricultural excise is collected from agricultural producers, to the proportion of 2.00% of the taxation base. Agricultural excise is an operating expense that applies to all agricultural producers with a few exceptions.

Proportion of Icelandic products in the Icelandic food market

The table above provides a fairly clear idea of the part played by horticulture in the supply of vegetables and potatoes. In 2008 the value of imported vegetables was about ISK 1,619 millions or about 2/3 of the consumption. For most other types of farm produce, such as meat and dairy products, imports are on a very small scale. In 2008 there were imported 101 tonnes of meat of all kinds, 201 tons of cheese, 54 tons of yoghurt and 4 tons of cream.

All grain, sugar etc. are imported except limited domestic production of barley – mainly for animal feeding (see page 5).

Sale of meat, kg per capita 1980-2007

Year	Lamb	Beef	Pork	Poultry	Horsemeat	Total
1980	43.5	10.6	5.4	3.9	3.3	66.7

Support targets have replaced production quotas

The total support target for milk is determined for each pricing year (September to August) and is based on sales on the domestic market. The total support target for milk in 2005-2006 was 105 million litres and was divided between registered farms. A processing plant shall pay the producer 52.9% of the minimum price of milk for production which falls within the support target. In addition he gets direct payments from the State Treasury corresponding to 47.1% of the minimum price.

The total support target for sheep products is a fixed amount each year. Holders of support targets receive a fixed payment per unit of support target from the Treasury. The only requirement is that they hold 0.6 sheep per unit of support target. The selling and buying of support targets in milk and sheep production is unrestricted.

International Comparisons - 10

How large a part of their expenses do European consumers spend on food and beverages?

The European Statistical Office, Eurostat, gathers information on prices and consumers' expenses in all the EEA-countries, and then some. The graph above shows how large a proportion of their total expenses European consumers spend on food and beverages (non-alcoholic). The picture is very clear: although countries in the northwestern part of Europe as a rule have higher food prices, the inhabitants spend proportionally less on food. In other words: The higher the wages, the lower the proportion of total expenses goes to food and drink.

AGRICULTURAL ASSEMBLY

Board (7)

The Farmers Association of Iceland (Bændasamtök Íslands; BÍ) is a general farmers' association. Its main objectives are as follows:

Safeguarding the interests of farmers, operate instructional and advisory services. Negotiate contracts with the government with respect to agricultural products and represent the farming community as a whole. Operating a network of consultants in livestock farming, soil management, farming technology, economics, land management, organic farming and land benefits. The maintenance of records with respect to all livestock species and selective breeding, farm produce and harvest. The publication of the periodicals Freyr and Bændablaðið as well as instructive and statistical booklets, the Farmers' Manual, the Agricultural Journal etc. The operation of a breeding bull center. Supervise special government projects and the observation of law. The association has total staff of 47.

BÍ has five divisions of operation: Social Division – Consulting Division – Finance and Office Division – Computer Department – Publishing and Public Relation Division
